Press Release

CoSoSys releases a new mobility software for U3 smart Drive Computing Platform

Carry it Easy brings useful office tools to the U3 smart drives

Sept. 19, 2005 – CoSoSys releases a new version of its' Carry it Easy™ application for U3 smart™ drives.

The new Carry it Easy is an all-in-one application that combines useful functions needed by modern mobile users. The application brings new usage opportunities and benefits to U3 smart Drive users. Mobile professionals, students and other users can now carry and manage files, e-mails and internet favorites needed everyday.

Carry it Easy is designed to be started from the U3 smart drives launchpad and can be downloaded from the U3 Software Central. The software is offered at a Special Introductory Price of US\$ 19.95 until 31. December 2005. Carry it Easy has a 30 days free trial period during which the users have full access to all the functions. Current users of Carry it Easy will be able to get the U3 Edition for free.

Carry it Easy offers the U3 smart drive user a multitude of useful functions. An intuitive and stylish user interface allows access to different options.

The simple My Documents synchronization function allows the users to have all important documents with them. To save valuable space on the U3 smart drive a special “zip” button also lets you significantly compress your data.

The portable e-mail function lets users copy their Outlook Express data on the U3 smart drive and even run it from there on other computers. E-mails can be sent, contacts added and when returning to the home computer everything can be restored.

The Internet functions provide those who switch computers often with several advantages. Carry it Easy lets users synchronize their Internet Explorer Favorites and Firefox Bookmarks and then access them from another computer. Any changes that are made can be saved and then synchronized back.

With the No Trace Browsing function the users can surf the internet and leave no trace behind on the used host computer. All the browsing-related data (cookies, history, cache) is stored on the U3 smart drive and can be deleted afterwards, leaving the host computer unmodified as if nothing has happened.

Additionally, Carry it Easy features a unique USB Lost & Found™ mechanism that allows the user to write down contact information in case the U3 smart drive is lost. The finder will be able to read the contact data and return the U3 smart drive to the owner.

Carry it Easy also has a status bar that displays at a glance how much space is left on the U3 smart drive and a USB Info tab that lets the user see useful details about the smart drive.

Carry it Easy is Windows 2000 and XP compatible and it requires administrative rights on the computers used. Carry it Easy™ is available in English, German, French, Italian, Spanish, Portuguese and Traditional Chinese.
