Encryption solution EasyLock, Finalist in Info Security Products Guide's Global Excellence Awards

EasyLock, the portable data encryption solution developed by CoSoSys, is one of the finalists of the Encryption category

Bucharest, Romania – January 18, 2012 – CoSoSys announced today that its portable data protection and encryption solution, EasyLock, is a finalist in the Encryption category of the 8th Annual edition of the Global Excellence Awards organized by Info Security Products Guide, the industry's leading information security research and advisory guide. These prestigious global awards recognize security and IT vendors with ground-breaking products and solutions that promote innovation and advancements throughout all business and tech fields.

EasyLock is an enterprise grade portable data encryption solution for Windows, Mac OS X and Linux, which turns any mobile storage device into a portable data safe. The application ensures military-level protection for data stored on USB flash drives and other portable storage devices through its 256bit CBC-mode AES encryption. Moreover, it allows cross platform mobility by giving users the chance to protect their files while they are in transit and access them from different operating systems, all through its easy to use and intuitive interface.

"We are very proud to have our EasyLock encryption application selected as a finalist in such a prestigious competition. This nomination highlights and rewards our efforts to offer both home and business users a portable security solution that not only makes moving data around easier, but transforms the complicated encryption process into a more natural task, rather than an inconvenient burden," said Roman Foeckl, CoSoSys CEO.

The Info Security Products Guide Global Excellence Awards recognize and honor excellence in all areas of information security. The 2012 edition rewards top of the line products in over 30 categories, along with the best companies and professionals in the IT field. The winners of the competition will be announced at the Awards Dinner held in San Francisco on February 29, 2012.

About Info Security Products Guide Awards

Info Security Products Guide sponsors leading conferences and expos worldwide and plays a vital role in keeping end-users informed of the choices they can make when it comes to protecting their digital resources. It is written expressly for those who are adamant on staying informed of security threats and the preventive measure they can take. You will discover a wealth of information in this guide including tomorrow's technology today, best deployment scenarios, people and technologies shaping info security and market research that facilitate in making the most pertinent security decisions. The Info Security Products Guide Awards recognize and honor excellence in all areas of information security. To learn more, visit www.infosecurityproductsguide.com and stay secured.

About CoSoSys

CoSoSys is specialized in network device control, endpoint security and data loss prevention (DLP) for Windows / Mac and the development of applications for portable storage device enhancement. The application portfolio includes functions from device control, file tracing and shadowing, password security, data synchronization and network security. CoSoSys distributes its products globally through Distributors, Resellers and directly to users at <http://www.EndpointProtector.com> and <http://www.CoSoSys.com>. CoSoSys is an independent software developer since a management buyout from Astaro in July 2011. CoSoSys enjoys a continuously growing installation base of users worldwide and was recognized in 2011 as one of the fastest growing technology companies being a winner of the 2011 Deloitte Technology FAST 50 ranking for Central Europe. The company has offices in Germany, the United States and Romania.
