Endpoint Protector, Finalist in Info Security Products Guide's Global Excellence Awards

The Endpoint Protector Appliance for Device Control and Data Loss Prevention is one of the finalists of the Endpoint Security category

Bucharest, Romania – January 17, 2012 – CoSoSys announced today that its device control and data loss prevention solution, Endpoint Protector Hardware and Virtual Appliance, is one of the finalists in the Endpoint Security category of the Global Excellence Awards, a yearly contest organized by Info Security Products Guide, the industry's leading information security research and advisory guide. These prestigious global awards recognize security and IT vendors with advanced, ground-breaking products and solutions that are helping set the bar higher for others in all areas of technology.

The out-of-the-box device control and data leakage prevention solution for Windows and Mac OS X, the Endpoint Protector Appliance, proactively secures endpoints against the latest threats affecting businesses worldwide, preventing data loss and theft, data exposures and other security breaches that commonly occur when portable storage gadgets like USB flash drives and lifestyle devices are part of the work process. Designed for computer networks ranging from 20 to over 5000 endpoints and available as both hardware and virtual appliance, Endpoint Protector offers full control over device usage, tracking and reporting of all data transferred in or out of the protected network and enforces encryption of data in transit on portable devices, all through an easy to manage central Web-based management interface.

“Having the Endpoint Protector Appliance named finalist in such a prestigious competition comes as recognition of our efforts to offer an efficient endpoint security solution in terms of performance, competitiveness and usability that covers all the security and device control needs of a company” said Roman Foeckl, CoSoSys CEO. “We are extremely proud of what we have accomplished so far and we will continue to develop and release highly reliable and innovative endpoint security solutions designed to respond to the latest security challenges of the business world.”

The Info Security Products Guide Global Excellence Awards recognize and honor excellence in all areas of information security. The 2012 edition rewards top of the line products in over 30 categories, along with the best companies and professionals in the IT field. The winners of the competition will be announced at the Awards Dinner held in San Francisco on February 29, 2012.

About Info Security Products Guide Awards

Info Security Products Guide sponsors leading conferences and expos worldwide and plays a vital role in keeping end-users informed of the choices they can make when it comes to protecting their digital resources. It is written expressly for those who are adamant on staying informed of security threats and the preventive measure they can take. You will discover a wealth of information in this guide including tomorrow's technology today, best deployment scenarios, people and technologies shaping info security and market research that facilitate in making the most pertinent security decisions. The Info Security Products Guide Awards recognize and honor excellence in all areas of information security. To learn more, visit www.infosecurityproductsguide.com and stay secured.

About CoSoSys

CoSoSys is specialized in network device control, endpoint security and data loss prevention (DLP) for Windows / Mac and the development of applications for portable storage device enhancement. The application portfolio includes functions from device control, file tracing and shadowing, password security, data synchronization and network security. CoSoSys distributes its products globally through Distributors, Resellers and directly to users at <http://www.EndpointProtector.com> and <http://www.CoSoSys.com>. CoSoSys is an independent software developer since a management buyout from Astaro in July 2011. CoSoSys enjoys a continuously growing installation base of users worldwide and was recognized in 2011 as one of the fastest growing technology companies being a winner of the 2011 Deloitte Technology FAST 50 ranking for Central Europe. The company has offices in Germany, the United States and Romania.
