## Press Release

### **Stay Clear of Computer Threats in Vacation and Business Travel with **Carry it Easy +Plus Version 3.0****

**The new Carry it Easy +Plus Version 3.0 adds a Website Password Manager and PC-Screen Lock functionality to beef up security for USB flash drive users that access their data on public PCs like in internet cafés or hotel business centers**

Bucharest, 30-July-2008 CoSoSys announces the version 3.0 release of its award winning Carry it Easy +Plus software for portable storage devices. The new software version includes features that focus on increased security, productivity and comfort for users of portable storage devices when working away from home.

When vacationing or travelling for business, the simplest technology-bound actions on your daily routine can expose you to real threats. Accessing your webmail account in an Internet café or on a different public PC you might run across in hotel business lounges or in airports exposes you to having your login credentials stolen by keyloggers or other malicious applications. The same can happen when plugging in your notebook in an unsecured network.

With the new SafeLogin feature in Carry it Easy +Plus as your password manager, all your website login credentials are stored securely in encrypted format on your portable storage device and automatically entered on any PC without the use of a keyboard. This feature does not only make logging in secure but also more convenient.

Another new feature in Carry it Easy +Plus is the PC-Screen Lock that turns your portable device into a screensaver lock. When activating this option you turn your portable storage device into a unique key that accesses or locks your PC when moving around your workplace and away from the computer.

Carry it Easy +Plus offers road warriors or people working on multiple PCs many vital features that allow for a pleasant and effective work experience: 128 bit AES data encryption, Outlook e-mail, contact and calendar sync, File & Folder Sync, No Trace Internet Browsing, Internet Favorites Sync, portable Windows Mail/Outlook Express, Data Compression and the Lost & Found feature.

Carry it Easy +Plus can be used on any PC that has Windows Vista, Windows XP or Windows 2000 installed and is available in 17 different languages.
